1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 5/12/08 has been entered.

The amendment of 5/12/08 has been entered. Claims 2-5, 7-13, 15-37, 61-70 are pending.

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 2-5, 7-13, and 15-37 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

A. It is unclear what is intended by the recitation of claims 3, "A method of preparing an aqueous dispersion of at least two isocyanate terminated polyurethane prepolymers". It is noted that at least the first prepolymer is required to have the unreacted isocyanate groups blocked. It therefore has no terminal isocyanate groups. It is unclear if the preamble is intended to require deblocking of the blocked isocyanate groups though this is not recited in the claims or if "isocyanate terminated" is intended to cover blocked isocyanate groups which are not technically isocyanate groups or if something else is intended.

B. It is unclear what is intended by claim 13 "prepolymers are neutralized prior to mixing" since this would not appear to be possible with the newly recited method of claim 3 which forms the second prepolymer in the presence of the first such that there are no prepolymers prior to mixing.

C. It is unclear what is intended by "said polyurethane" of claim 21 because there is not antecedent basis for "said polyurethane" as the claims from which it depends have been amended. If the isocyanate terminated polyurethane prepolymers are intended, it is unclear which one since "polyurethane" is singular and there are two prepolymers at least.

D. It is unclear what is intended by "said non-uniform particles" of claims 32-37 because the claims from which they depend do not have antecedent basis for "non-uniform particles". It is therefore unclear if "non-uniform particles" are intended to be added in addition to the other recited components or if this recitation is intended to further limit one or all of the already recited components. In the latter instance, it is unclear which component is so limited.

4. Claims 61-70 are allowable over the prior art considered which does not teach the claimed method nor provide rationale to make other disclosed methods into the methods of these claims.

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Patrick D. Niland whose telephone number is 571-272-1121. The examiner can normally be reached on Monday to Thursday from 10 to 5.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, David Wu, can be reached on 571-272-1114. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
